

# POPCORN MACHINE INSTRUCTIONS

1. Plug machine into a 110V outlet
2. Turn on both switches (heat and motor)
  - For first batch, let kettle pre-heat for approx. 4 minutes
3. Pour oil contents into kettle
  - If oil is hardened, let oil melt
4. Pour popcorn kernels into kettle and close lid
5. Once popcorn pops, it will overflow and fall to bottom of machine
6. Listen for popping sound to slow down
7. Once popping stops, dump kettle immediately to avoid burning
8. To continue popping consecutively, repeat steps 3-7.

~ Always keep both kettle switches off when not using machine!

~ If you have burned corn or excessive smoke, turn kettle heat off for a few minutes

## Cleaning

1. Empty any leftover popcorn/kernels from machine
  2. Wipe down glass inside with warm soapy water and dry
  3. Empty kettle and wipe inside with warm soapy water and dry
- DO NOT SUBMERSE KETTLE IN WATER – DAMAGE WILL OCCUR TO HEATING ELEMENT AND MOTOR!**
