

# **SOFT ICE CREAM MACHINE INSTRUCTIONS**

1. Keep machine in a temperature of 75 degrees or lower. NEVER place machine in direct sunlight.
2. Empty contents of 1 bag into machine. DO NOT ADD ICE!
3. Plug in machine and press green power button to on.
4. Press Middle and bottom buttons to “I”

**It will take approximately 1 ½ hours to get the consistency of soft ice cream.**

## **Refilling**

- You can add more liquid to existing ice cream when it gets low. When refilling, NEVER fill above MAX line on the bowl. Refilling will make existing ice cream softer as it mixes. Allow time for unit to refreeze.

## **Cleaning**

1. Empty out leftover ice cream
2. Rinse bowl with clean water. Allow to dry.
